

NU Açaí Oil

Product Name	Açaí Oil
Product Description	Extracted from the pulp of the Açaí fruit (<i>Euterpe oleracea</i>), the oil is dark green in colour and contains Palmitic, Palmitoleic, Stearic, Oleic and Linoleic fatty acids.
Uses	Manufacture of creams, lotions, soaps, and skin care and other cosmaceutical and personal care products.
Ingredient Listing	Açaí Oil
Available Formats	5 litre plastic container
Storage Conditions	Cool, dry and well ventilated environment (25°C), in original and tightly sealed containers.
Expected Shelf-life	24 months
Saponification value	193.70 (mg NaOH/g)
Palmitic Acid	15 - 20%
Palmitoleic Acid	1 - 2%
Stearic Acid	1 - 2%
Oleic Acid	60 – 65%
Linoleic Acid	10 -15%
Peroxide Index	20.78 (meq/ 1000g)
G.M.O. Status	This product does not contain any genetically-modified material to the best of our knowledge
Safety and Handling	This product is a pure vegetable which is not considered to present any hazard during normal use.

Marketing Information

:: Açaí Oil

The oil extracted from the Amazonian palm berry, the Açaí fruit, contains a high level of Oleic and Linoleic acids (Omega 6 and 9), similar in proportion to that found in Olive Oil, as well as being rich in phytosterols, vitamins and minerals. The oil is highly emollient, penetrating the skin quickly and acting an effective moisturizing oil. These properties combine to form a good base for use as a carrier oil in cosmeceutical and personal care products.
